

# INFASTRUCTURE

## Light Rail

We are proud to have been involved in construction of The Channel Tunnel, The Jubilee Line Extension and the Nottingham Tram System, as well as station developments including the award-winning London Blackfriars, Liverpool Street and Kings Cross stations.

We are currently actively engaged in CrossRail and the Scottish Borders railway development, supplying tunnelling and track specialists, electricians, site foremen and everything in between.

## Airports

Airport projects come with unique security and safety challenges. Our staff are vetted to the strictest standards, are highly trained and fully compliant to receive the necessary security clearances to work airside on taxiway and runway redevelopments. The Danny Sullivan Group has proudly provided staff for the refurbishment of Heathrow Airport Terminal 5 and major airport projects throughout the UK.

## Highways

We have worked on a multitude of the UK's major highway projects. We have never failed to deliver an array of skilled and specialist operatives to our clients. And, unlike temporary labour agencies, Danny Sullivan staff are all fully employed by the Company.

## Energy & Utilities

In the UK, the energy and utilities sector is currently enjoying significant growth especially with the government introducing nuclear power as the nations low-carbon energy resource. There are currently more than 60,000 people employed in the nuclear power industry - and this number is growing. Danny Sullivan Group are prepared and have the resources to fill any skills gaps that may arise.

## Communications

We specialise in matching clients with skilled and reliable communication technicians. We have worked within the industry since our infancy and pride ourselves in providing a professional and accurate service.
